TFRS16 impact on rental revenue

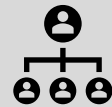

- Upon the adoption of **TFRS16**, rental revenue and discount whose **contract value can be reasonably estimated** is recognized on a **straight-line basis** (comparison of before and after TFRS16 adoption illustrated below)
- In the **early periods of the contract**, rental revenue would be **higher than the actual revenue** as it includes the future rate increases. Towards **the end of the period**, the positions become **inverted**
- Upon **contract renewal**, rental revenue will be recognized on a **straight-line** based on the **total value of the renewed contract** (including all future rate increases)
- Applies to **tenants with >1-year rental contracts** (i.e., excludes temp. contracts, consignment for amounts above min. guarantee, services and utilities income)
- Discount amortization may **vary based on the best estimated amount** provided to tenants at a certain point in time

Cost performance achieved as planned

Fixed Costs

Personnel

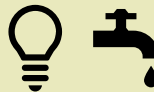

Op. Leases

Outsourced

Whilst overhead costs (e.g., headcount, committed expenditures) are maintained, certain aspects of costs are reduced (e.g., OT, travel) or optimized for further cost efficiencies (e.g., contracted services)

Variable Costs

Utilities

Marketing

Administrative

Although 4Q20 sees a QoQ increase in variable costs as the situation recovers, efficiency measures have been continuously enacted, resulting in a considerably lower cost base compared to the previous year
